I. INTRODUCTION AND PURPOSE

This document is an inofficial L^AT_EX template to be used to create a suitably formatted submission for the journal Medical Physics. It calls RevTeX and can be used for the the different submission types (e.g. Research Article, Technical Note etc.) described on the
5 journal's website.

A. Section numbering

Some submission types require section numbering whereas for others, such as Technical Notes, sections and subsections are not numbered. If your submission requires unnumbered sections, uncomment the following line in the L^AT_EX header:

```
10 % \setcounter{secnumdepth}{0}
```

B. Another subsection
